This CD-ROM contains  
a trial version

With SEE Building LT you can quickly and easily create professional and standardized installation plans & single-line diagrams

## Compatible with other CAD packages

An integrated DXF / DWG converter allows to import and export SEE Building LT drawings to other CAD software packages.

## UPGRADEABILITY

SEE Building LT can be upgraded to other IGE+XAO packages (such as SEE Building) which offer specific symbols libraries and CAD functionalities such as automatic cross referencing, terminal plans,....

## ERGONOMICS

All functions & commands in SEE Building LT are designed specially for electrical engineering and its intuitive interface allows productivity immediately, without training.

With SEE Building LT, you can open as many screens as you want and you are able to work across several projects at once.

- Drag and drop functionality
- Native ActiveX included
- Project Management tools

## EASY SYMBOL CREATION

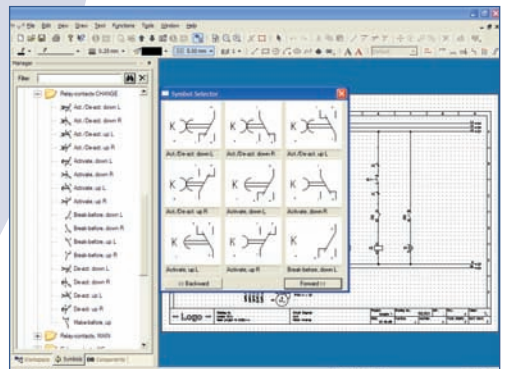

Do you do the same type of drawing quite often? With SEE Building LT, you can create symbols very easily, without the use of complicated symbol editors. Simply design the shape, insert its name and description and input it directly in a symbol library. This also applies to symbol groups (as part of a diagram).
