

SEE Electrical functionalities	Basic	Standard	Advanced
Project manager	●	●	●
Real-time lists for: components, terminals, parts, contacts, cables, cable cores, wires, PLC I/Os, documents	●	●	●
Filtering/sorting into lists + storing the filter or sorting	●	●	●
Multiple symbol libraries (including IEC) with graphical overview, grouping and searching	●	●	●
Creation of custom symbols and drawing macros	●	●	●
Real-time component numbering, generation of cable names and terminal numbers, and cross referencing	●	●	●
Real time connection and open contacts check up	●	●	●
Locking of component names, terminals, and wire labels	●	●	●
Graphical cable definition - including user defined symbols	●	●	●
Custom project template creation	●	●	●
Bi-directional compatibility with other CAD systems (DWG, DXF, DXB, DWF and XPS (DWFx))	●	●	●
Microsoft ActiveX® interface	●	●	●
Importing of images (JPG, BMP, PNG, TIF, GIF, PCX and PDF)	●	●	●
Copying of symbol groups between projects	●	●	●
Working on multiple projects simultaneously	●	●	●
Customizable working environment	●	●	●
Standard CAD drawing facilities and dimensioning capabilities	●	●	●
Support for hyperlinks on graphics	●	●	●
Redlining functionality	●	●	●
512 available layers	●	●	●
Auto-backup feature	●	●	●
Export in Enhanced Metafile Format and picture files (JPG, BMP, PNG, TIF, GIF, PCX)	●	●	●
Export formats for Weidmüller and other label printers	●	●	●
Integrated equipment database		●	●
Import of manufacturer's data into equipment database in Microsoft Excel® format		●	●
Display equipment information on components		●	●
Support for finding an equipment with suitable number of contacts for coils and components with auxiliary contacts		●	●
Contact mirror display for coils		●	●
Automatic contact numbering of coils-and components with auxiliary contacts		●	●
Support of automatic renumbering the contacts		●	●
Checking for overloaded contacts in coils-and components with auxiliary contacts		●	●
Completing components like coils, multilevel terminals, connectors, ...		●	●
Cable management (cable equipment database)		●	●
Handling of deck terminals, Management of connectors		●	●
PLC I/O manager & PLC operands numbered automatically in several available formats		●	●
Organize diagrams in folder structures		●	●
Function/location management + graphical function/location boxes		●	●
Wire directions display and editing		●	●
User definable numbering method for all elements and references		●	●
Renumbering of entire terminal strips, renumbering of cables		●	●
Find and replace text throughout entire project		●	●
Insertion of pages and deletion of pages gaps		●	●
Duplicate component name check		●	●
Database editors (single entry editing)		●	●
Graphical terminal plan with automatic detection of up to 20 bridge types		●	●
Graphical cable plan including spare cores + wiring list		●	●
Parts list sorted by function/location		●	●
Enable duplicate wire numbering for different sub folders		●	●
Graphical signal management with predefined signal properties /wire numbering in several formats		5	●
Auto Connection			●
Draw orthogonal multi-pole wires			●
Wire flow direction control (important for wire and wiring list)			●
Several sets of types definable for macro/page (-> options)			●
Cross-reference navigator (go to) with marking function (come from)			●
Navigation from Database and specific Graphical lists to drawings			●
Database manager for functions/locations/products /products (aspects) including ability to manage nested aspects			●
Importing of PLC assignment lists in Microsoft Excel® format			●
Configure project tree allowing for custom graphical and database lists			●
User defined lists and components			●
Configuration of multicores (within single wire connections)			●
Changing of page templates for an entire project or a part of the project			●
Copy multiple pages and all sheets of a folder between projects			●
Advanced database editors (editing of several entries at once)			●
Insert components/terminals not in drawing by list			●
Terminal plan with graphics and terminal row picture plan			●
Cable terminal row plan			●
Connector matrix and plan			●
Product assembly list + Compressed BOM + Device list			●
Generate all necessary graphical lists in one shot			●
Database list/editor with texts from callouts: usable for revision management			●
Find and replace symbols throughout current page or entire project			●
List and label editor, report generator			●
Compare workspaces			●
