IGE+XAO launches the Prosyst suite to its French and German sales networks.

Hannover, Germany, April 16 2015

Having acquired 80% of Prosyst capital one year ago, IGE+XAO launches the Prosyst suite to its sales network. This trio of packages, dedicated to automation performance, covers the complete cycle, from design to operations.

The Prosyst suite is comprised of three major packages: ODIL, SIMAC and AIDMAP.

ODIL is a fully customizable software environment for automation studies used to generate documentation, PLC programs and HMI (Human to Machine Interface) applications. A single entry approach ensures consistency and quality of deliverables. ODIL was especially chosen by Renault and PSA at a worldwide level for all their projects.

SIMAC is a machine or process simulator. It allows the creation of virtual facilities, which the actual control systems architecture is connected to. The objective is to test and validate the control-command before the commissioning on site.

Finally, AIDMAP II is a software package that lets you record and analyze machines or any type of automated installation behaviour. Its principle function is to date and store all system variable changes to provide traceability, but it also allows time-based control, development, and anomaly diagnosis leading to increased reliability and optimized running. The new version 2.5 of AIDMAP II, launched at the Hannover Fair, brings additional German and Chinese user interfaces, compatibility with Siemens S7-1500 and S7-1200 PLCs as well as a new offer in modules with a new version covering unlimited watched variables.

"The Prosyst suite that has been introduced to our clients in the past weeks during our roadshows has created a lot of interest. The IGE+XAO Group now offers a unique software range covering the entire electrical installation lifecycle: from functional design to maintenance, including detailed design, PLC programming, simulation, manufacturing, on site commissioning and optimization. We took the opportunity of Hannover Fair 2015 to launch the Prosyst suite on the German market" declared Alain Di Crescenzo, Chairman and CEO of the IGE+XAO Group.

ABOUT THE IGE+XAO GROUP

For over 28 years, the IGE+XAO Group has been a software publisher designing, producing, selling and supporting a range of Computer Aided Design (CAD), Product Lifecycle Management (PLM) and Simulation software dedicated to Electrical Engineering. These software products have been designed to help manufacturers in the design and maintenance of the electrical part of any type of installation. This type of CAD/PLM/Simulation is called "Electrical CAD/PLM/Simulation". IGE+XAO has built a range of Electrical CAD/PLM/Simulation software designed for all the manufacturers. IGE+XAO employs 388 people around the world at 30 sites and in 19 countries, and has 82,375 licences. IGE+XAO is a reference in its field. For more information: http://www.ige-xao.com
