

PRESS RELEASE

The IGE+XAO Group enlarges its PDM offer (Product Data Management) with the launching of two new software packages: “SEE Project Manager LT” and “SEE Project Manager in the Cloud”.

Hannover, Germany, April 9, 2014.

At the occasion of the Hannover Fair, the IGE+XAO Group announces with the launching of two new software packages: “SEE Project Manager LT” and “SEE Project Manager in the Cloud”.

“SEE Project Manager LT” is a documentation and technical data management software dedicated to electrical projects. This collaborative tool enables the sharing and lifecycle management of electrical projects as well as associated documents while centralizing and securing on a server. Simple to deploy and learn, it is well suited for companies looking for a quick deployment with an immediate return on investment.

SEE Project Manager in the cloud offers in SaaS (Software as a Service) mode the same level of functionality as the LT level. This approach allows to view, manage and share projects and electrical data on any internet-connected terminal and to benefit from all cloud-computing services.

For Alain Di Crescenzo, Chairman and CEO of the IGE+XAO Group, “these two new packages confirm the Group strategy which consists in offering its customers, whatever their size, competitive software packages ranging from electrical installation design and setting up to maintenance, while providing a strong and integrated management of electrical projects and data”.

ABOUT THE IGE+XAO GROUP

For over 27 years, the IGE+XAO Group has been a software publisher designing, producing, selling and ensuring the maintenance of a range of Computer Aided Design (CAD) and Product Lifecycle Management (PLM) software. These software products have been designed to help manufacturers in the design and maintenance of the electrical part of any type of installation. This type of CAD/PLM is called "Electrical CAD/PLM". IGE+XAO has built a range of Electrical CAD/PLM software designed for all the manufacturers. At 31 July 2013, IGE+XAO employed 373 people around the world on 26 sites and 17 countries, and had 70,000 licences. IGE+XAO is a reference in its field.
