

PRESS RELEASE

IGE+XAO pre-announces “SEE 3D Electrical”, its new 3 Dimension environment dedicated to electrical installations design and maintenance.

Hannover, Germany, April 8, 2014

At the occasion of the Hannover Fair, IGE+XAO Group pre-announces “SEE 3D Electrical” a new 3D environment dedicated to electrical installations design and maintenance.

“SEE 3D Electrical” will be integrated with the Group’s different software solutions, especially SEE Electrical Expert’s Panel (cabinet design), Synoptic (cabling synoptic) as well as SEE Electrical’s Cabinet Layout.

“SEE Electrical 3D” environment integration will provide IGE+XAO customers with a complete, powerful, intuitive and business dedicated environment.

The Group already plans the commercial launching of the “3D Panel” package at the end of 2014. It will allow to automatically take into account manufacturing constraints as early as the design stage with the automatic component rail placement, the drilling plans making and the numerical-controlled machines management, all this while preventing collision or mounting inconsistency. “3D Panel” will also include advanced routing functionalities in order to optimize wire lengths, wire pathways as well as the wireway filling-rate.

In addition to modelization and powerful 3D functions, “SEE Electrical 3D” environment integration, while being independent, will offer large communication possibilities with third party packages.

For Alain Di Crescenzo, Chairman and CEO of the IGE+XAO Group “The “SEE Electrical 3D” technology will precisely meet engineering companies, panel builders, as well as electrical installers requirements as these companies require an independent, high performance, easy-to-use, open and dedicated to their requirements environment.”

ABOUT THE IGE+XAO GROUP

For over 27 years, the IGE+XAO Group has been a software publisher designing, producing, selling and ensuring the maintenance of a range of Computer Aided Design (CAD) and Product Lifecycle Management (PLM) software. These software products have been designed to help manufacturers in the design and maintenance of the electrical part of any type of installation. This type of CAD/PLM is called "Electrical CAD/PLM". IGE+XAO has built a range of Electrical CAD/PLM software designed for all industrial sectors. At 31 July 2013, IGE+XAO employed 373 people around the world on 26 sites and in 17 countries, and had 70,000 licences. IGE+XAO is a reference in its field.
