**Subject:**

# License installation for EED Mass Processing on PLM Hub computer

**Description:**

"Wire/Wire group calculation" and "Assign End-Fitting part Numbers" processes fail under Topology module without clear explanation or messages reporting any business processing.

**Our proposed solution:**

After installation of SEE Electrical PLM - Application Server, an x64 version of SEE EED has been installed. This version is used by SEE Electrical PLM - Hub to run the above processes.

You have to verify that your SeeStencil.xml file (license file) is present and correct in the installation directory, usually:  
C:\Program Files\IGE+XAO\SEE Electrical Equipment Definition VxRy\See\_Soft\Exe
