Environment management*

(symbols, part numbers, working methods, etc.)

- Bidirectional environment synchronization
- “Local environment” update according to “reference environment” (stored on server)
- Manual or automatic environment update
- Extractions (symbols, part numbers... added or modified in the local environment) can be sent to environment administrator for validation and implementation on the server “reference environment”
- Environment administration

Key benefits

- Essential PDM capabilities available immediately
- Fully integrated with SEE Electrical Expert and SEE Electrical
- Immediate return-on-investment
- Simple and fast to install, set up and deploy (no IT expertise to operate and support)
- Secured archiving process
- Always up-to-date and validated projects and environments
- No need for high performance network
- Use of local machine full performance

A complete range

IGE+XAO offers a complete range of PDM packages:

SEE Project Manager LT

The easy-to-use and simple-to-deploy documentation management solution for teams that need fast deployment, fast ramp up and immediate ROI.

SEE Project Manager

The intermediate PDM package with features such as full customization, handling of large organizations and complex lifecycles, BOM management, ERP integration, etc.

It is suited for small workgroups or large enterprise looking for a customized and scalable solution matching precise needs.

SEE Project Manager LT and SEE Project Manager can be mixed on the same network since data is completely compatible. Companies can start with SEE Project Manager LT and upgrade to SEE Project Manager when required.

SEE Project Manager PLM

The top of the range package for high-end PDM applications.

* Applies to SEE Electrical Expert only
