The leading sustainable enterprise platform for **electrical** design, simulation, engineering, and operations.

What we do

- We provide a comprehensive range of software, solutions and services to Design, Analyze, Engineer, Operate and Maintain electrical systems.
- Our offer enables a single source of truth for the entire Electrical Network through a multidimensional digital twin platform.

What makes us unique

- ETAP has the most comprehensive offer for ensuring electrical design and engineering consistency and seamless data flow across the project life cycle.
- Our unique model driven electrical digital twin positions us far ahead of the competition by providing design to operate capability with seamless data continuity.
- Our wide geographical presence enables us to serve the global market better than competition.

Our commitments

Safety

ETAP prioritizes safety by allowing engineers to simulate and analyze electrical power systems, helping identify potential risks, and ensuring compliance with safety standards.

Sustainability

ETAP drives digital transformation for sustainability, supporting our customers in their energy transition, empowering them to make decisions for a green and smart future across the lifecycle.

Reliability

ETAP is renowned for its reliability, providing accurate and consistent results in electrical system analysis and design. Engineers can trust its calculations and simulations to make informed decisions throughout the electrical project lifecycle from design to operation.

Resilience

ETAP demonstrates resilience by efficiently handling complex power system models and recovering from errors or disruptions. It ensures the continued functionality and stability of electrical grids, even in challenging situations.

Efficiency

ETAP streamlines the process of designing and analyzing electrical systems, improving efficiency in engineering workflows. It reduces the time and resources required with built in automation and collaboration tools. It also enables engineers to optimize system performance and make cost-effective decisions.

SEE Electrical

Intuitive electrical CAD software for electrical professionals

Overview of the product

SEE Electrical is an intuitive electrical CAD software that enables electrical professionals to efficiently create, document, and optimize electrical schematics, improving productivity, design efficiency, and accuracy in every project.

Customer challenges

- Lack of documentation and access to as-built drawings
- Minimizing errors while ensuring compliance and safety
- Time wasted on repetitive manual
- Customization for each project
- Collaboration across project stakeholders
- Cost constraints, lead time pressure, and accurate estimation

Benefits

Improved Documentation & Reporting

- Generate detailed documentation, including wiring diagrams, schematics, and bill of materials (BOMs) ensure quick reference to critical information.

Improved Design Efficiency

- Advanced design and drafting tools, automated repetitive tasks, libraries of symbols and components to streamline design.

Improved Safety & Compliance

- Electrical systems are designed and documented with industry standards reducing errors and simplifying compliance.

Improved Collaboration

- Easily generate your completed documentation, seamlessly collaborate with co-workers and business partners.

Benefits of moving to the new subscription bundles

Increased flexibility & scalability

Adjust the service to your business, whenever you need and wherever you expand.

Faster Innovation cycles

Incorporate best practices, stay up to date and future-ready with early access to latest improvements and innovation, contribute to product development.

Lower upfront cost & long-term pricing optimization

Predict and best manage your costs, preserve your investment with a lower cost of ownership, benefit from early bird cost advantages.

Best in class technical support & customer success teams

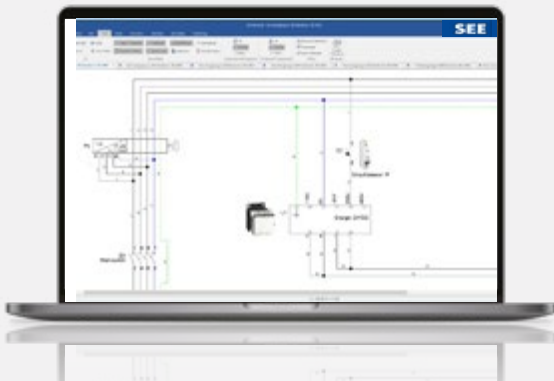

Leverage top notch technical assistance with remote desktop diagnostics from specialized dedicated teams as well as dedicated new customer success support, access exclusive onboarding material for smooth technology adoption.

Simplified customer experience

Enjoy price stability over years, payment facility, online and offline user access, easier administration and uninterrupted service.

Flexible options for your unique requirements

Launch Bundle

Easy-to-use software for creating efficient electrical schematics and wiring

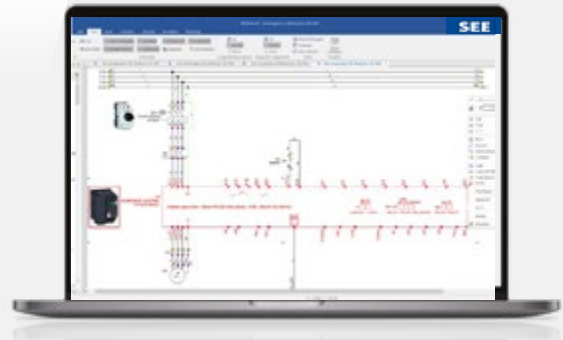

- Designed for small businesses with your needs in mind
- Ensure a smooth learning curve
- Provide all the essential tools required to excel from day one

Grow Bundle

Includes all **Launch** bundle features

Intuitive software for creating detailed electrical schematics and 2D cabinets

- Developed for the needs of designers who frequently produce and revise electrical documentation.

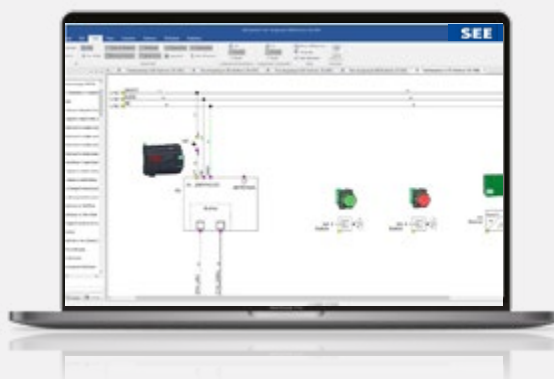

Scale Bundle

Includes all **Launch & Grow** bundle features

Top-level software for creating complex electrical schematics, panel layouts, and set up design processes across organizations

- Powerful and feature-rich bundle designed to meet the demands of industry leaders.
- Elevate your electrical design capabilities to unmatched levels of efficiency and innovation.

+ Available Add Ons For Your Unique Needs

01.

3D Panel Design

Create a virtualized environment to gain a more spatial perspective within a cabinet design.

Quickly create, optimize, and anticipate issues within your design.

02.

3D Panel Manufacturing

Virtual enclosure wiring and optimal manufacturing integration.

Create precise documentation for your shop floor workers through all assembly.

03.

Building Implantation

Insert your electrical equipment onto the floorplan and automatically generate your single line diagrams in multiple standards.

Generate dedicated graphical lists to speed up the building installation assembly.

04.

Shop Floor Assistant

Provides a clear view on devices and wires for mounting in their position in the panel.

Save time and improve consistency in panel series assembly.

05.

Translation

Quickly translate your project into multiple languages.

Translation available for English, German, Italian, and Spanish.

06.

SEE Web Catalog

Most complete online catalog in the market with over 1,000,000 references provided by over 900 manufacturers.

Includes more than 20,000 specific equipment symbols and growing.

Project manager with Auto-backup feature and daily backup of the projects	⊗	⊗	⊗
Real-time lists for: components, terminals, parts, contacts, cables, cable cores, wires, PLC I/Os, documents	⊗	⊗	⊗
Filtering/sorting into lists + storing the filter or sorting	⊗	⊗	⊗
Multiple symbol libraries (including IEC, NFPA) with graphical overview, grouping and searching	⊗	⊗	⊗
Creation of custom symbols and drawing macros	⊗	⊗	⊗
Real-time component numbering, generation of cable names and terminal numbers, and cross referencing	⊗	⊗	⊗
Real time connection and open contacts check up	⊗	⊗	⊗
Locking of component names, terminals, and wire labels	⊗	⊗	⊗
Graphical cable definition - including user defined symbols, custom project template creation	⊗	⊗	⊗
Selection of the equipment code from the attached apparatus catalogue	⊗	⊗	⊗
Bi-directional compatibility with other CAD systems (DWG, DXF, DXB, DWF and XPS (DWFx))	⊗	⊗	⊗
CanecoBT and SE EPD Ecodial Connects. Single and multiline schematics automatic generation	⊗	⊗	⊗
Importing of images (JPG, BMP, PNG, TIF, GIF, PCX and PDF)	⊗	⊗	⊗
Copying of symbol groups between projects	⊗	⊗	⊗
Working on multiple projects simultaneously	⊗	⊗	⊗
Customizable working environment	⊗	⊗	⊗
Standard CAD drawing facilities and dimensioning capabilities	⊗	⊗	⊗
Support for hyperlinks on graphics, exporting active project into web format	⊗	⊗	⊗
Redlining functionality	⊗	⊗	⊗
512 available layers	⊗	⊗	⊗
Function/Location Management	⊗	⊗	⊗
Export in Enhanced Metafile Format and picture files (JPG, BMP, PNG, TIF, GIF, PCX)	⊗	⊗	⊗
Exporting labels to various printer types	⊗	⊗	⊗
Integrated equipment database	⊗	⊗	⊗
Import of manufacturer's data into equipment database in Microsoft Excel® format	⊙	⊗	⊗
Display equipment information on components, duplicate component name check	⊙	⊗	⊗
Support for finding an equipment with suitable number of contacts for coils and components with auxiliary contacts	⊙	⊗	⊗
Contact mirror display for coils	⊙	⊗	⊗
Automatic contact numbering of coils-and components with auxiliary contacts	⊙	⊗	⊗
Support of automatic renumbering the contacts	⊙	⊗	⊗
Checking for overloaded contacts in coils-and components with auxiliary contacts	⊙	⊗	⊗
Completing components like coils, multilevel terminals, connectors, ...	⊙	⊗	⊗
Cable management (cable equipment database)	⊙	⊗	⊗
Handling of deck terminals, Management of connectors	⊙	⊗	⊗
PLC I/O manager & PLC operands numbered automatically in several available formats	⊙	⊗	⊗
Organize diagrams in folder structures	⊙	⊗	⊗
Aspects management, parts list sorted by function/location	⊙	⊗	⊗
Wire directions display and editing	⊙	⊗	⊗
User definable numbering method for all elements and references	⊙	⊗	⊗
Renumbering of entire terminal strips, renumbering of cables	⊙	⊗	⊗
Find and replace text throughout entire project	⊙	⊗	⊗
Insertion of pages and deletion of pages gaps	⊙	⊗	⊗
Database editors (single entry editing)	⊙	⊗	⊗
Graphical signal management with predefined signal properties /wire numbering	⊙	⊗	⊗
Graphical terminal plan with automatic detection of up to 20 bridge types	⊙	⊗	⊗
Graphical cable plan including spare cores + wiring list	⊙	⊗	⊗
Intelligent PDF with navigation	⊙	⊗	⊗
Enable duplicate wire numbering for different sub folders	⊙	⊗	⊗
2D cabinets and panels designing with synchronization between circuit & cabinet symbols	⊙	⊗	⊗
Auto Connection, Open Data and Auto Generation to update or generate projects by using a Microsoft Excel® spreadsheet	⊙	⊗	⊗
Draw orthogonal multi-pole wires	⊙	⊗	⊗
Wire flow direction control (important for wire and wiring list)	⊙	⊗	⊗
Several sets of types definable for macro/page (▶ options)	⊙	⊗	⊗
Cross-reference navigator (go to) with marking function (come from)	⊙	⊗	⊗
Navigation from Database and specific Graphical lists to drawings	⊙	⊗	⊗
Database manager for functions/locations/products /products (aspects) including ability to manage nested aspects	⊙	⊗	⊗
Importing of PLC assignment lists in Microsoft Excel® format	⊙	⊗	⊗
Configure project tree allowing for custom graphical and database lists	⊙	⊗	⊗
User defined lists and components	⊙	⊗	⊗
Configuration of multicores (within single wire connections)	⊙	⊗	⊗
Changing of page templates for an entire project or a part of the project	⊙	⊗	⊗
Copy multiple pages and all sheets of a folder between projects	⊙	⊗	⊗
Advanced database editors (editing of several entries at once)	⊙	⊗	⊗
Insert components/terminals not in drawing by list	⊙	⊗	⊗
Terminal plan with graphics and terminal row picture plan	⊙	⊗	⊗
Cable terminal row plan	⊙	⊗	⊗
Connector matrix and plan	⊙	⊗	⊗
Product assembly list + Compressed BOM + Device list	⊙	⊗	⊗
Generate all necessary graphical lists in one shot	⊙	⊗	⊗
Database list/editor with texts from callouts: usable for revision management	⊙	⊗	⊗
Finding and replacing symbols throughout current page or entire project	⊙	⊗	⊗
List and label editor, report generator	⊙	⊗	⊗
Comparing of projects and environment manager tool to control multiusers work	⊙	⊗	⊗

How to choose the right Subscription Bundle

01. Assess

- Assess your business requirements
- Assess your budget
- Assess your future needs

02. Compare

- Compare features and functionalities
- Compare prices
- Compare scalability

03. Select

- Get a demo
- Make the right choice

Also available

SEE Electrical Expert

SEE Electrical Expert is an intuitive Electrical CAD software which enables electrical professionals to design, document, and maintain complex electrical schematics.
