**Subject:**

UPDATE THE SYMBOLS OR THE ILLUSTRATIONS WITHIN A FILE

**Possibles causes:**

**Our proposed solution:**

There are three levels of symbols (or illustrations) concerning the update:

- The symbols of the environment
- The symbols of the folder
- The symbols inserted in the sheets

In the Symbol Explorer, the icon of the symbols contained in the folder is of blue colour and the one of the symbols contained in the environment is of green colour:

• **Modify and update a symbol (or an illustration) of the environment**

- To modify a symbol of the environment:

- Click the command "Environment/Open Symbol" (or "Environment/Open Illustration")
- Select the symbol (or illustration) in the explorer
- The symbol (or illustration) is displayed in the editor

The title of the dialogue box shows that you are modifying a symbol of the environment:

- To update a symbol of the environment:

After having saved your symbol, you must update it in the file.

- Open a sheet
- Click on the command "**File/Update According to the Environment**"
- Select **Symbols** (or Illustrations) in the "Process" tab

- Click on "**Execute**"

The symbol (or the illustration) will be updated in the file.

The modified symbol is therefore available in the symbols library or explorer in order to be inserted in the sheet.

- On the other hand, if this symbol was already inserted in a sheet, it won't be updated.

To update the symbols inserted in the sheets, click on "**Tools/Update of Symbols or Illustrations Inserted in the Sheet**".

- **Modify and update a symbol (or an illustration) of the project**

- Right-click on the symbol that will be modified

- Click on "**Modify Symbol Definition**"

- The symbol (or the illustration) is displayed in the editor

The title of the dialogue box shows that you are modifying a symbol of the project:

- To update a symbol of the file

After having saved your symbol, it is automatically updated in the file.

The modified symbol is therefore available in the symbols library or explorer in order to be inserted in the sheet.

- On the other hand, if this symbol was already inserted in a sheet, it won't be updated.

To update the symbols inserted in the sheets, click on the command "**Tools/Update of Symbols or Illustrations Inserted in the Sheet**".
